Welcome to SSL Day 9!

End Student Projects, Review for Final

Day 9

1

Student Project Lectures

Day 9

2

Server-Side Languages

Review for Final

For this review, you will build a single web page that:

• Presents the user with a form to choose a translation language and type a word.

• Connects to http://glosbe.com/a-api to get the translation data via JSON.

• Outputs the translated word and its translated definition on the same page as the form

• Maintains all the form data on the results page for an easy second translation

Use either language

Day 9
